

DAILY BUILD RULES

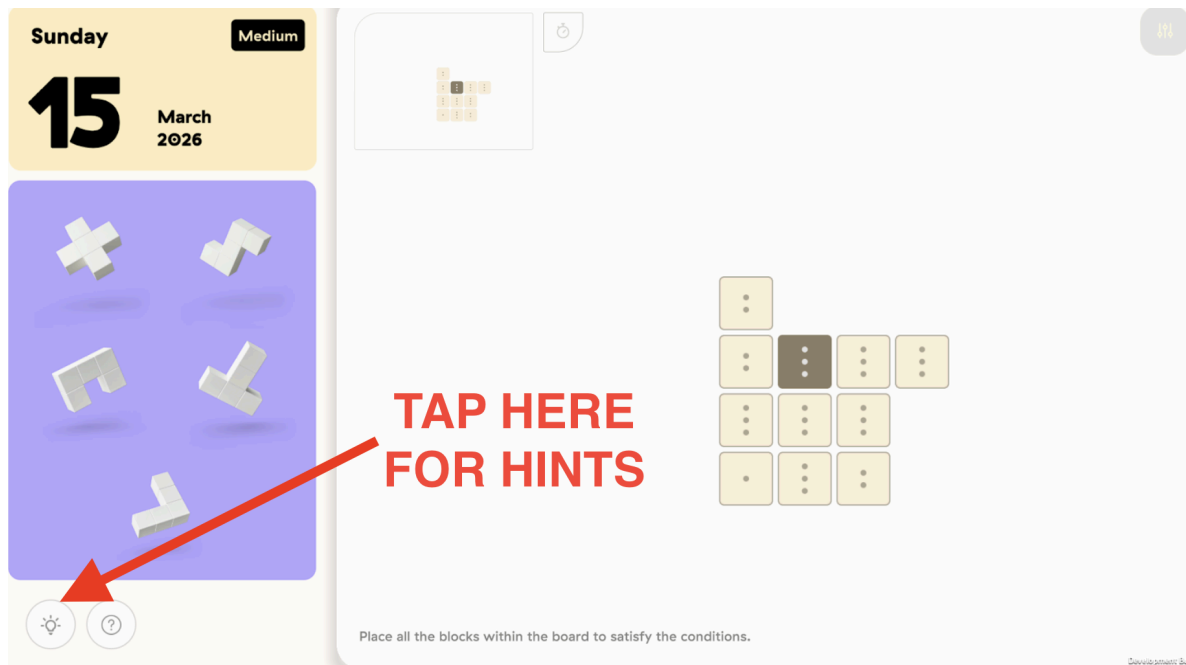

How to Play Daily Build

In Daily Build, your goal is to make each shape using only the blocks indicated, and following the rules on each tile.

The left side of the screen shows which blocks you need to use for each puzzle. You must use all the blocks shown to solve the puzzle. And all blocks must fit inside the puzzle's shape.

If you're ever stuck on a puzzle, you can tap the hint button to show where to place one of the blocks.

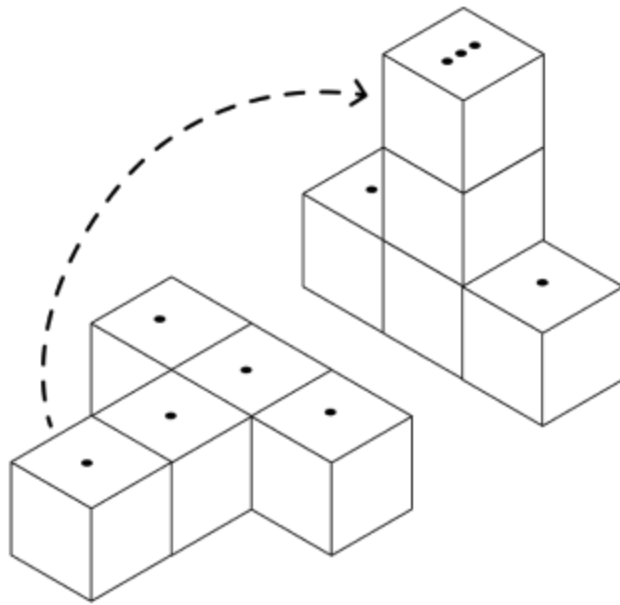

Tile Height

The number of dots on each tile show the **exact height you must build over them.**

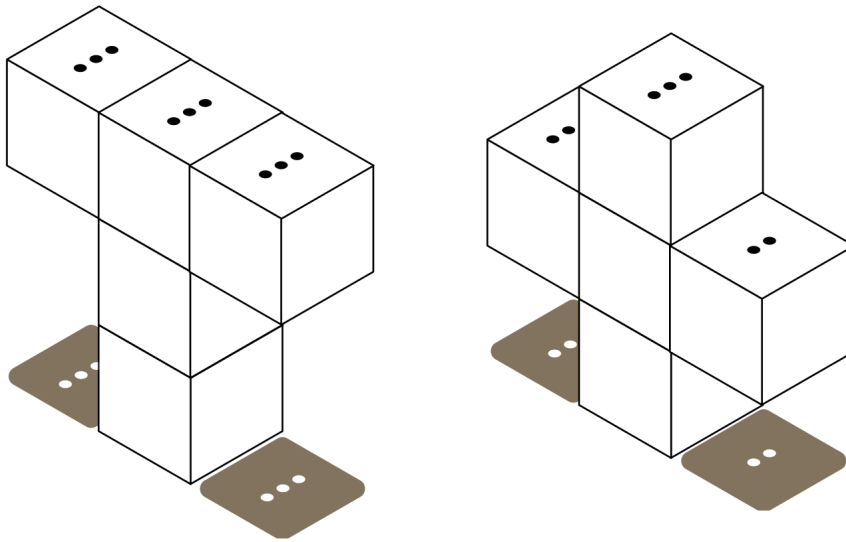

The same block can be placed on different sides to match different heights. And blocks can be stacked to make different heights, as long as all blocks are still touching the screen.

Shadow Tiles

Shadow tiles show that you must match the height over them, but **without the blocks directly touching the tile.**

As long as the blocks can stand on their own without you touching them, it's a valid move.

Modes & More Puzzles

There are three puzzles to play every day: Easy, Medium, and Hard.

- Easy puzzles only require you to place the blocks flat.
- Medium puzzles are typically 3-5 blocks and use height and shadow tiles.
- Hard puzzles are typically 5-6 blocks

You can also go back and play any previous puzzles you haven't completed.

Each puzzle completed logs your completion time, along with the number of hints used.

New puzzles come out daily at midnight local time. Come back every day for more brain-bending, block-building fun!
